

Website — Feature & Change Documentation

Repository: github.com/keshavvin/palanhar | Stack: React 19 + Vite + Tailwind CSS v4 + Framer Motion + Recharts | Document date: 12 June 2026

1. Overview

The website was rebuilt from a basic marketing site into an **investor-pitch demo** implementing the "Investor Management & Dividend Distribution System" SRS, plus a repaired and polished marketing shell, a brand loading experience, and a Cow Seva awareness page. All investor features are **frontend demos** driven by one mock-data file — no backend is required to present the site.

2. New Features & Their Routes

Feature	Route	What it does
Investment Plans ("ecommerce")	<code>/invest</code>	Plan cards (Option A ₹10,000 / B ₹50,000 / C ₹1,00,000+), live dividend calculator using the SRS formula, Growth Roadmap (₹2 Cr → ₹80 Cr, DSCR 2.36), 7-step money-flow visual, sample share certificate, FAQ.
Investor Registration + KYC	<code>/investor/register</code>	8-step wizard: mobile OTP (demo: any 6 digits) → email → profile → PAN upload → Aadhaar upload → bank → nominee → review & submit. Generates Investor ID, has a "Simulate Admin Approval" demo button.
Investor Dashboard	<code>/investor/dashboard</code>	Portfolio stat cards, growth chart, dividend wallet (Transfer to Bank / Reinvest modals), downloadable certificate, dividend history, transactions, documents repository, notifications.
Admin / CMD Dashboard	<code>/admin</code>	KPIs, funds-raised & plan-mix charts, dividend declaration console with live pool math, investor approval queue (working Approve/Reject), share register, audit trail, export buttons.
Cow Seva article page NEW	<code>/gau-seva</code> (old <code>/cow-seva</code> redirects)	Full Gau Seva article: values it builds, social/cultural/environmental/agricultural/economic contributions, four duties of care, six practical ways to participate, farm-visit CTA. Linked in header & footer.
Brand splash loader NEW	all pages	3-second full-page splash on every load/refresh showing the cow-and-calf logo with rotating green/golden arcs; also shown during page-to-page lazy loads. Honours reduced-motion.
Logo in header & footer NEW	all pages	The cow-and-calf logo (<code>public/cow-loader.png</code>) replaces the 🐮 emoji in the Navbar and in the Footer (inside a cream circle).
Marketing shell repair	<code>/</code> <code>/about</code> <code>/products</code> <code>/services</code> <code>/gallery</code> <code>/contact</code>	Theme fixed (brand colors now actually render), junk inline styles removed, real contact details, A2/Gir/panchgavya product catalog, Home investment teaser, 404 page, page transitions, scroll restoration.

3. Where to Change What — Edit Guide

Most content lives in **data files**; edit these without touching component code.

To change...	Edit this file	Look for
Phone numbers, email, address	<code>src/components/Footer.jsx</code> , <code>src/components/Contact.jsx</code> , <code>src/components/FinalCTA.jsx</code>	<code>tel:/mailto:</code> links and the address block
Investment plan names / minimum amounts	<code>src/data/investorData.js</code>	<code>investmentPlans</code>
Dividend example (net profit, rate, pool)	<code>src/data/investorData.js</code>	<code>dividendExample</code> , <code>calculateDividend</code>
Demo investor (name, ID, portfolio, wallet)	<code>src/data/investorData.js</code>	<code>currentInvestor</code> , <code>dividendHistory</code> , <code>walletSummary</code> , <code>walletTransactions</code> , <code>investorDocuments</code> , <code>investorNotifications</code>
Admin numbers (investors, funds, queue, register, audit log)	<code>src/data/investorData.js</code>	<code>adminStats</code> , <code>fundsRaisedMonthly</code> , <code>investorDistribution</code> , <code>pendingInvestorQueue</code> , <code>shareRegister</code> , <code>auditTrail</code>
Growth projections / ₹80 Cr target / DSCR	<code>src/data/investorData.js</code>	<code>growthProjections</code> , <code>financialTargets</code>
Products (names, prices, features)	<code>src/data/products.js</code>	<code>dairyProducts</code> , <code>panchgavyaProducts</code> , <code>agricultureProducts</code>
Homepage hero banner images (3-image slideshow)	<code>public/hero-banner-1.jpg</code> / <code>-2.jpg</code> / <code>-3.jpg</code>	Replace files (keep names); interval in <code>src/components/Hero.jsx</code> <code>SLIDE_INTERVAL_MS</code>
Services	<code>src/data/services.js</code>	<code>services</code>
Testimonials	<code>src/data/testimonials.js</code>	<code>testimonials</code>
Splash screen duration (currently 3s)	<code>src/App.jsx</code>	<code>SPLASH_DURATION_MS = 3000</code>
Logo image (loader + header + footer)	<code>public/cow-loader.png</code>	Replace the file, keep the same name
Brand colors / fonts	<code>src/index.css</code>	<code>@theme</code> block (Tailwind v4 — do NOT add a <code>tailwind.config.js</code>)
Cow Seva article text / sections	<code>src/pages/CowSevaPage.jsx</code>	<code>values</code> , <code>careStandards</code> , <code>participation</code> , <code>contributions</code> arrays + JSX prose
Header menu links	<code>src/components/Navbar.jsx</code>	<code>navLinks</code>
Footer link columns	<code>src/components/Footer.jsx</code>	<code>linkColumns</code>
Browser tab title, SEO description	<code>index.html</code>	<code><title></code> , meta description/og tags
Homepage section order	<code>src/pages/Home.jsx</code>	Component order in JSX
Routes (add/remove pages)	<code>src/App.jsx</code>	<code>lazy()</code> imports + <code><Route></code> list

Rule of thumb: never use inline `style={{...}}` props for spacing/colors in this codebase — use Tailwind utility classes. The registered brand utilities are `primary-green` , `dark-green` , `light-green` , `cream-white` , `golden` (e.g. `bg-`

```
primary-green , text-golden ).
```

4. New Files Created

Pages (src/pages/)

- InvestPage.jsx, InvestorRegisterPage.jsx, InvestorDashboardPage.jsx, AdminDashboardPage.jsx, CowSevaPage.jsx, NotFoundPage.jsx

Investor components (src/components/invest/)

- InvestHero, InvestPlans, PlanCard, DividendCalculator, GrowthRoadmap, FinancialFlow, TrustCompliance, CertificatePreview, InvestFAQ, useCountUp
- registration/: Stepper, FormFields, OtpInput, StepMobile, StepEmail, StepProfile, StepDocuments, StepBank, StepNominee, StepReview, SuccessPanel

Dashboard components (src/components/dashboard/)

- DashboardHeader, DashboardModal, PortfolioStats, PortfolioGrowthChart, DividendWallet, ShareCertificate, DividendHistoryTable, WalletTransactions, DocumentsRepository, Spinner

Admin components (src/components/admin/)

- AdminHeader, AdminKpiGrid, AdminCharts, DividendConsole, AdminApprovalQueue, AdminShareRegister, AdminAuditTrail

Shared (src/components/)

- BrandLoader.jsx (logo loader with spinner ring + SVG fallback), ScrollToTop.jsx, InvestTeaser.jsx (homepage investment band)

Data & assets

- src/data/investorData.js — single source of truth for ALL investor-module demo data and INR formatting helpers
- public/cow-loader.png — brand logo used by splash, route loader, header and footer

5. Verification Status

Check	Result
Production build (<code>npm run build</code>)	PASS — route-split bundles per page
Lint (<code>npm run lint</code>)	PASS — zero errors
Responsiveness matrix — 10 viewports (320–1920px) × 11 routes = 110 automated browser checks	PASS — no horizontal scroll, no console errors
Visual inspection — full-page screenshots of all key pages at mobile/tablet/desktop	PASS
Content validated against company marketing collateral (address, phones, A2/Gir positioning, 200 cows / 2,000 L/day, ₹80 Cr roadmap, DSCR 2.36)	PASS

6. How to Run

- Install once: `npm install`
- Development: `npm run dev` → `http://localhost:5173`
- Production build: `npm run build` → output in `dist/` (deploy to any static host)

Demo notes: OTP accepts any 6 digits; approvals, transfers, downloads and exports are simulated in the browser. All money figures are illustrative. Dividends in the live product depend on company performance and Board approval.
